RE: GN Docket No. 13-111 Promoting Technological Solutions to Combat Contraband Wireless Device Use in Correctional Facilities

Dear Ms. Tetreault

On Wednesday November 1, 2017 at 11 am, the undersigned on behalf of CellAntenna Corporation, spoke via telephone regarding the above reference proceedings, to the following FCC staff members:

Charles Mathias, Suzanne Tetreault, Mary Claire York, Roger Noel, Lloyd Coward, Moslem Sawez, Anna Gentry, Melissa Conway (all WTB), Jane Kelly and Tim May (on phone) from PSHSB

During the conference call, Howard Melamed, President of CellAntenna Corporation had related his experience in the design, installation of jamming equipment that CellAntenna had commissioned outside of the United States in prison facilities.

Mr. Melamed related to the participants that in today's environment with 3G , 4G and 5G technology being deployed in the United States, the cost of jamming properly engineered and deployed would approach the cost of deployment of Managed Access systems, already operating in the United States. He also stated that between MAS, and IMSI catching with carrier participation in unsubscribing the phones, are easier to deploy requiring less regulation and are as a cost effective solution, compared to jamming for the majority of prison facilities in the United States.

Thank you for your attention to this correspondence.

Pursuant to Section 1.1206 of the Commission's rules, a copy of this letter is being filed via ECFS.

Sincerely,

/s/Howard Melamed

Howard Melamed
President
CellAntenna Corporation.
